

Possible messages of error:

1. In case you can't log in to <https://eguvernare.stsisp.ro/unnpr/index.php>, if you receive an unauthorized user (NEAUTORIZAT), please contact our representatives at DigiSign S.A. (<http://www.digisign.ro/contact/>)

a) If the certificate was recently issued, it will be functional within approximately 7-10 days from the issuance date.

b) If the page does not appear, there may be a DNS problem or the IP address is set to the PROPRIETATI->ALTERNATE DNS SERVER. It takes about 8.8.8.8.

2. In case you can't authenticate, despite the fact that the CNP/SERIE and NUMBER are different, try the utility from the MAI https://eguvernare.stsisp.ro/kit/kit_cnabdep.exe. Complete details are available at <https://eguvernare.stsisp.ro/>

After installing this utility, the verification application will be functional.

Access to the MAI database for verifying certificates will be done through **INTERNET EXPLORER!**

In case you have a 64-bit system, use **INTERNET EXPLORER** on **32 Bit**. On **INTERNET EXPLORER** 64-bit version, it does not work.

Verificare date persoane

The address of the application is <https://eguvernare.stsisp.ro/unnpr/>.

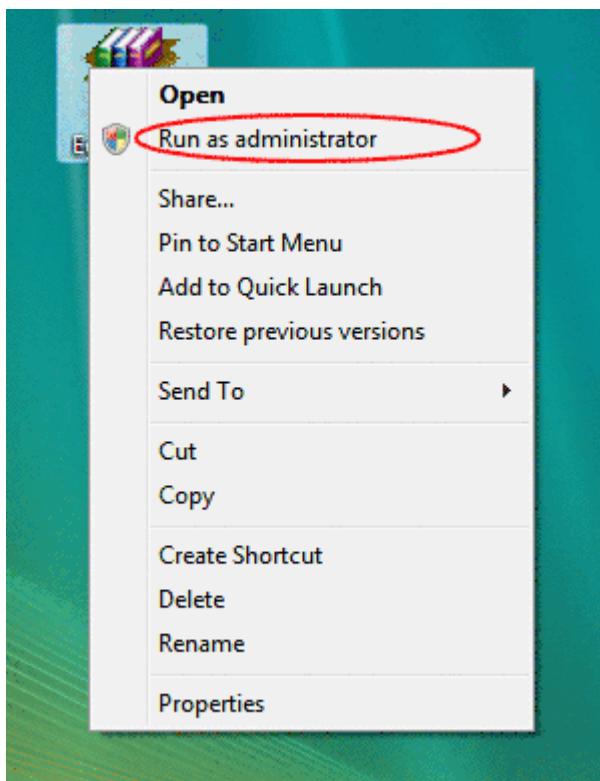

Attention: all links must end with a slash (/), otherwise the page will not load! (ex. .../unnpr/).

The software kit required for using the application is located at the address https://eguvernare.stsisp.ro/kit/kit_cnabdep.exe.

Possible errors when accessing the application:

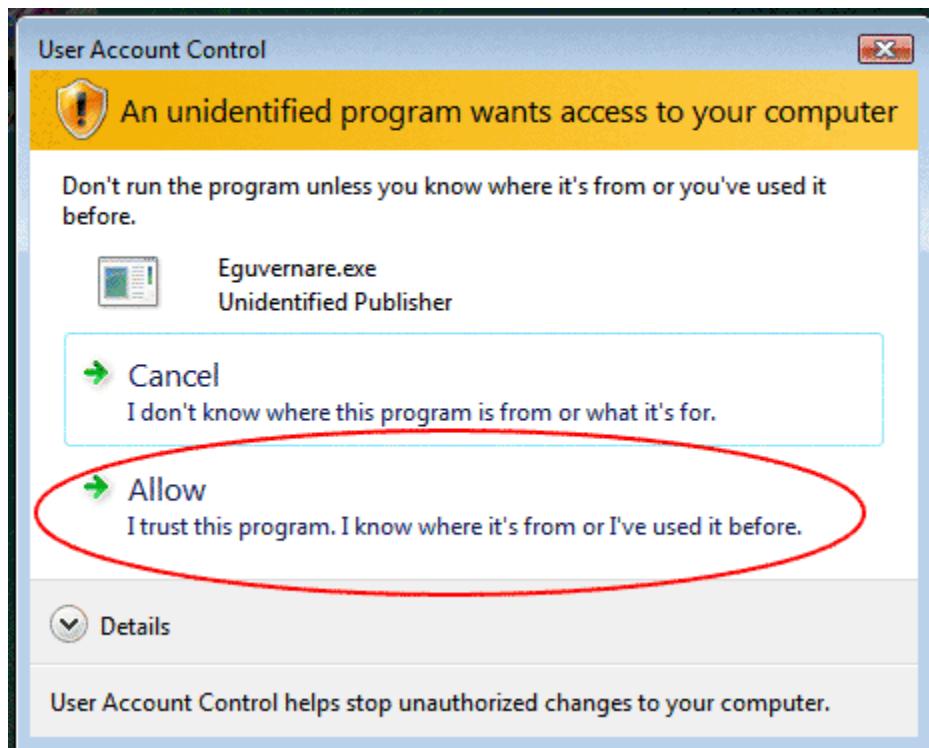

Pentru Sitemul de oprare WINDOWS VISTA si WINDOWS 7 se apasa click dreapta pe program si in fereastra aparuta se alege "Run as Administrator".

Daca apare fereastra de mai jos se alege Allow.

Se urmeaza pasii normali pentru instalarea kitului.

- 1.1.** Se raspunde cu Yes la pop-up urmator "Security alert": "This Web site needs to decrypt data using your private key". "Do you want this Web site to decrypt the data now?"

- 1.2.** Se introduc informatiile in campurile aplicatiei.

- 1.3.** Se apasa butonul "Verificare"
